Your advantages:

- Online database
- Feedstocks and polymers
- Capacities: current and projected
- Availability: FM, maintenance etc.
- Up-to-date information

Yes, we would like to receive online access to the Polyglobe database for the following number of users (please complete the form): _____

number of users	discount	license p.a.
single-user	-	1,480.00 EUR
additional users (1 - 4), price per user	30%	1,036.00 EUR
additional users (5 or more), price per user	35%	962.00 EUR

Polyglobe

Worldwide polymer producers, plants, capacities

Taking market transparency
to a **new dimension**.

The latest dimension in market transparency.

The volatility of global feedstock markets poses a lot of challenges for plastics buyers, who have to rely more than ever on up-to-date and reliable information on available supplies. Traditional market reports are expensive, quickly out of date and seldom contain all the necessary information – not to mention the fact that finding the right data can take a lot of time. Polyglobe offers a completely new means of getting all this information:

www.polyglobe.net

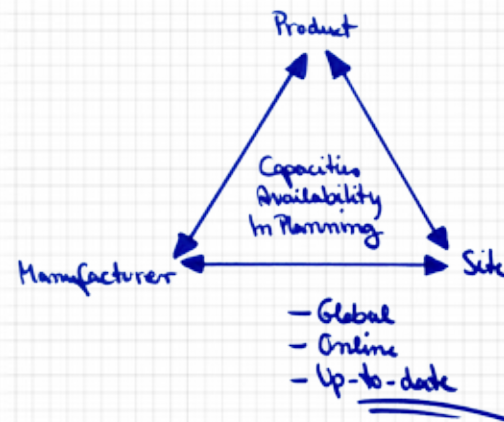

What is Polyglobe?

A completely new kind of capacity database

The online database contains information on producers, sites and capacities for almost all types of plastics and feedstocks on a global scale.

The comprehensive data is updated on a daily basis. Polyglobe contains the latest announcements of force majeure and other output restrictions as well as upcoming maintenance turnarounds. It also lists future plants, capacity extensions and shutdowns by their specific date.

All information is easily accessible and complemented by a wide range of charts and maps.

What does Polyglobe offer?

Transparency and planning for your plastics purchases

Capacities

- Detailed information on every global site
- Selection by product, manufacturer and region/country
- Total global capacities by product, manufacturer and region/country
- Market share, ranking

Availabilities

- Information on every material and region
- Forecasts by material, manufacturer and region
- Up-to-date, in planning, historical timeline

In Planning

- New facilities, expansions, shutdowns
- Forecasts by material, manufacturer and region
- Growth rates, changing market shares

Manufacturers

- Product portfolio
- Activities by region/country
- Degree of integration
- Network, joint ventures

Materials

- Monomers, standard plastics, engineering and high-performance plastics, biopolymers, polyurethanes
- Link between monomers and polymers (supply chain)

Which are the world's top 20 PP producers?

Is Europe's polyamide production experiencing any bottlenecks?

How frequent do forces majeures occur at European PP production sites?

What will the global PE market look like in five years' time and what market share will it hold?

What exactly does Sinopec's product portfolio comprise?

In which joint ventures is Sabic involved?

What are Braskem's expansion plans?

How far integrated are European LDPE producers?

Polyglobe has the answer to all these types of questions – always up-to-date and just a mouse click away!

The epitome in market transparency – at a price everyone can afford

Say goodbye to the days of procuring expensive market studies and compiling your own exhaustive databases: With Polyglobe all the information you need is just a mouse click away – and it can be yours for an amazingly competitive price!

Traditional studies (other providers)		Polyglobe and PIE	
Market studies, CD-ROM, 4 annual updates, one grade	EUR 3,500	Polyglobe online access, up-to-date, all grades	EUR 1,480
In-house capacity databases, research and maintenance, 30 minutes/week	EUR 1,750	subscription to PIE - Plastics Information Europe	EUR 360
price report for one grade	EUR 5,100	PIE Spot Price Monitor	EUR 440
Annual cost	EUR 10,350	Annual cost	EUR 2,280
